After a very late supper, we put up at the Frontier, the best motel we have seen on this trip.

(June 8th, continued)

Jumped a deer on the road w. of Long Valley Junction. It had been dark after several

looks as if there were a number of passes low enough to permit intergradation between decolor and lutesus, between the Price-Emercy and the Ephraim-Marysvale areas. The valleys are extensively cultivated. The rattlers must live up in the rocks. This certainly needs more study.

Started home from Grand Junction at 10⁴⁰, after tending to various chores in town. The first 20 miles are through cultivated lands, where there should have been gopher snakes, but weren't. From there to Green River is a high rolling plateau, increasingly arid and alkaline as one proceeds westward. Sometimes there were large rocks piled along the roadside where lizards should have perched but none were seen. It was warm and part cloudy. We reached Green River at 12⁵⁰ and Price at 3¹⁰. Here we turned southward instead of going up to Springville or Spanish Fork as originally planned. We went south through Castle Dale and Emery, and then turned northwest to Salina. From here we went south again on 89 to Hong Valley Junction and thence west to Cedar City over the mountains.

1 PC. deserticola L DOR. 3 mi. E. of Salina, Sevier County. Sagebrush. Perfect deserticola marks on the head.

Reached Salina at 5⁴⁵, and Cedar City at 9⁵⁰. Miles today 445. The driving was hard in some areas because of roads under construction, or twisty mountain driving.

Having missed Cedar Breaks yesterday as we passed through that area in darkness, we went there this morning. A beautiful view. A Forest Ranger told me rattlers were found up to 8500 feet at Mesa Verde.

We again left Cedar City at 11¹⁰ homeward bound. hunched and got a telegram at St. George. Saw a few lizards on rocks between St. George and the Nevada state line -- the first seen in a long time.

1 snake (patch-nose?) lost on the road at Wheaton Spring, S.B. Co., the only live snake seen on the entire trip.

Reached Hermo at 7¹⁵; warm but not hot. Started the evening drive at 7⁵⁵ going west on U.S. 466 from the 466-91 junction. Kramer Junction (466-395) at 8⁵⁰; dark. ~~3/4~~ 1/4 moon. 75° F. little breeze.

Adelanto at 9⁵⁰ 68°

1 Kingsnake MDOR (saved) 2 mi S. of Adelanto.

Mullers Corner (just 395-66-91) at 10¹⁰ 64°

A very disappointing evening drive. Maybe too cool. They weren't out as shown by lack of DORs. The traffic was heavy. Reached San Bernardino at 11⁰⁰ Cool
